

Description of Capstone Project

Topic: Management of Business and Storage System

1. Overview:

- Manage the business of some products for customers, and the storage system to control the flow of business.
- Build the system for the users, customers to view, look up and buy the products.

2. Management business and storage:

- Objective: build the system for the business and storage management.
- Targeted audience: The customers use the business system, and the managers can use both the business and storage system.
- What can they do with our systems?

Customers:

- View the information of the products
- Search for the products
- Buy the products
- Check the status and history of their orders

Manager:

- View the information of the products
- Search for the products in system
- Import and export the products
- Check the history of business
- Daily report to save the information of business: income – interest, sold products, inventory,...
